

Coen 120
Aman Sirohi

I want to do a mini disk for my project. The Functions I will need to use are:

- 1) Play
- 2) Stop
- 3) Next track
- 4) Previous Track
- 5) Pause
- 6) Hold
- 7) Volume
- 8) Record
- 9) Programmable Tracks
- 10) Naming each track
- 11) Search for a track
- 12) Set the delay between each track

This seems a bit hard but I think but with some work I should be able to do it.
